SMALL TALK

Hey [name], how's your day been? Where are you calling from? How is everything there? Great to hear, and just to check, do you have a pen and a piece of paper handy to make notes? Alright, well we can dive right in and get started with the call if you want? (Wait for them to agree.)

SMALL TALK SECOND PHASE

OK, well how this call will go is I'll start by asking you some questions about your business and the application that you filled out for us, and then if it sounds like we can help and if it sounds like we're a good fit to work together, I'll walk you through the program that we offer and how it works. And at the end, you can make a decision on whether you'd like to be a part of it or not. How does that sound?

UNDERSTAND CURRENT SITUATION AND ISOLATE THE PROBLEM

Q: What motivated you to book in the call with me?

Q: What's holding your business back from hitting \$30K/month right now?

Q: What do you feel that you need to succeed? If I could wave a magic wand and give you anything...?

WE WANT THEM TO REALIZE THEIR PROBLEM HERE TO SEE WHAT'S MISSING OR WHAT'S WRONG.

Q: Would you say that you have a proven process to scale your business in place?

CREATE PAIN AND DOUBT

Q: Got it. So it seems like the biggest problem/s here are [summarize]. Would you agree with me on that?

Q: Ok, got it. And it sounds like you've tried a lot of other stuff... Why do you think none of it's worked?

Q: What do you think is stopping you from figuring all of that out on your own?

If they don't give a clear answer:

Got it. So, just to get further clarity here, typically what I find is that there's usually one or two reasons that people book in these calls. It's either:

1. There's a knowledge gap and basically they don't know what they don't know, or
2. They know that given a few years, they could probably crack this themselves, they just don't want to waste the time and spend all the years learning the technical aspects that approach takes...

Which one of those do you feel like you fall into?

Q: Understood. So in terms of branding it sounds like what we do here is completely new to you?

We want them to realize here: “Wow, this is brand new. This is unlike the other stuff that hasn't worked. I don't have a proper strategy, a framework, clear rules to follow. I don't know what I'm doing. I need help.

”We want them to think: “This person knows me, they've listened, and yes, that is my exact problem.”

TRIGGEER THEIR IMAGINATION

Q: Got it, and with that in mind, I mean, what's the ultimate goal here business-wise?

Q: If we had to put a monthly revenue target on this, what would be your first milestone?

Q: Understood, and what's the motivation behind getting to that specific amount?

Q: Ok, I hear you. So, that [amount], would that be enough for you to confidently grow your business, increase revenue, or would you need something else? Is that ultimately the goal — to scale to \$30K/month with a strong backend?

Q: Ok, understood. So, what's the long-term vision for your business?

SELF ADMISSION

The prospect will not buy without the belief that they cannot fix their problem on their own.

Q: Ok, so you'd like to get to [growth target] and we know why you want to get there, for the reasons you've just said, so...

Q: What would you say is stopping you from achieving all of that on your own?

Q: Got it, and can I ask you an honest question here? Just a bit of a curve-ball question, but, why not just stay where you are? Keep things as-is, stick with what's going on right now?

Q: Ok, got it. Now, three quick questions for you:

- Have you read our website as of yet? [pause]
- Got it. And have you Googled us and read the reviews from past clients?

[pause]

Q: I mean, why is scaling your business so important to you?

Q: Understood. And I always hesitate to ask this, but purely so we're on the same page here, let's say that you threw in the towel on this business journey and kept things as-is — what impact would that have?

Q: When did all of this become so important? Why are you so focused on this right at this moment?

Q: Where would you say your commitment level is? What makes you say that?

Q: Why now?

Eliminate the 'I need to think about it' objection by getting them to admit — this needs to happen now.
